RE: Revisions to the Non-Recurring Rates and Fees
Charged by the Water and Wastewater Utilities

Subsequent to the recent City Council discussions on this matter, the Utility Service Board has reviewed the fees and charges that were originally presented.

The Board continues to believe that these fees should be representative of the costs experienced by the Columbus Utilities for these services. However, they understand the concerns expressed at the City Council meeting and wish to be responsive to the Mayor's and Council's wishes, and so they have authorized adjustments to their original proposal that we hope will assist in expediting passage of these changes.

The provisions of this section shall not apply, however, to an applicant's lot or land served by a donated water main extension described in Section 13.08.200, nor to an applicant served by a lot which was the subject of an agreement dated before the effective date of the ordinance codified in this section between an owner or developer and the utility provided for a deposit and subsequent refund, described in Chapter 13.08.

- ii. The meter deposit provided in Chapter 13.08; and,
- iii. Such service rates and charges established for water service.

Interest is to be computed monthly, upon the principal sum unpaid at the beginning of each monthly period. The rate of interest is to be that rate in effect at the time of application, as established by the utility service board from time to time. The amount of interest so found due shall be deducted from the amount of aggregate monthly payments made each month and the balance of the aggregate of such monthly payments shall be credited against the principal due. Prepayment shall be permitted

without penalty. The deferred payments on such assessment charge shall be evidenced by a promissory note. Such assessment charge shall not be refunded to the applicant.

Sewer Assessment Charge:

a. Each applicant for sewage service hereafter who shall be connected to a sewer primary main or secondary main of the sewage works, shall be required to pay the sewage works an assessment charge equal to thirteen dollars and ten cents (\$13.10) per lineal foot of the applicant's lot or land abutting thereon.

b. Exceptions. The provisions of this subsection shall not apply however, to the following:

- a) Applicants whose lot or land is served by a donated sewer main extension;
- b) Applicants for service for lots or parcels of land which have already been assessed under Barrett Law proceedings or assessed and paid under board of works proceedings for a local sewer adjacent to their property;

c. If no part, or an unusual part, in the judgment of the sewer works, of the applicant's lot or land shall abut said sewer primary main or secondary main, such applicant shall be required to pay the sewage works an assessment charge as shall be determined to be fair and equitable in the sole judgment of the sewage works.

d. Such assessment charge described above shall be in addition to the service rates and charges established for sewer service.

e. Payment of Assessment Charge. Such assessment charge shall be paid in full before construction of such sewer primary main or secondary main is commenced, if such construction shall be required to provide such sewer service, and before sewer service will be furnished by the Sewage Works except as follows:

If the property owner shall make application to the sewage works for a residential service account, then at the time application for such service is made, or on or before the date such property owner shall be required to connect to the sewer system of the sewage works, the sewage works may permit such assessment charge, with interest as herein provided, to be paid in a maximum of one hundred twenty (120) equal, consecutive monthly payments, which include principal and interest, commencing before connection is made. Interest is to be computed monthly, upon the principal sum unpaid at the beginning of each monthly

period. The rate of interest is to be that rate in effect at the time of application, as established by the utility service board from time to time. Prepayments, in whole or in part, shall be permitted without penalty. The deferred payments on such assessment charge shall be evidenced by a promissory note.

f. Such assessment charge shall not be refunded to the applicant.

g. Penalty for Unlawful Connections. It is unlawful for anyone to make connection to a sewage works' primary line or secondary line without first making application for connection and complying with the provisions of this section. Violators shall be subject to a penalty of twice their assessment charge plus twice the minimum monthly sewage rate for the period involved. Anyone using the services of the sewage works and not paying for such services, or not reporting the use of such services, as of the effective date of the ordinance codified in this section, shall be subject to a penalty of twice the assessment charge plus twice the minimum monthly sewage rate for the period from the date of said ordinance.

h. State Board of Health. All sewer main extensions, whether made by the sewage works or by developers who subsequently donate such sewer mains to the sewage works, shall be constructed and installed in accordance with the rules and regulations of the Indiana State Board of Health and all other necessary regulatory bodies and must be approved by such bodies. (Ord. 89-72 § 1, 1989)

I. Upon implementation of the new schedule of nonrecurring charges and fees, the Council hereby deletes all of the following references to nonrecurring charges and fees for water and sewer utilities:

Ordinance No. 24, 1992, §§ 1(i)-1(k); and
Ordinance No. 12, 1999, § 1; and
Ordinance No. 72, 1989, § 1; and
Ordinance No. 11, 1999, § 1; and
Ordinance No. 23, 2003.

J. Ordinance No. 16, 1999, §§ 205, also found in § 13.16.020 E. as codified in the City of Columbus Municipal Code, shall be amended to read:

There shall be two (2) classes of building sewer permits:
1) for residential and commercial service, and (2) for service to establishments producing industrial waste. In either case, the owner or his agent shall make application on a special form furnished by the said City Sewage Works. The permit applications shall be supplemented by any plan, specifications or other information considered pertinent in the judgment of the Director. A permit and inspection fee of Seventy Dollars (\$70.00) for a residential or commercial building sewer permit and Seventy

Dollars (\$70.00) for an industrial sewer permit shall be paid at the time the application is filed to the City Sewage Works.

This Ordinance shall be implemented and enforceable upon approval of the applicable rates by the Indiana Utility Regulatory Commission.

STAFF REPORT

CITY OF COLUMBUS PLAN COMMISSION (August 13, 2014 Meeting)

Docket No. / Project Title: RZ-14-10 (Gentry Park)
Staff: Leanne Wells
Applicant: Mizac, LLC (Gentry Park)
Property Size: 8.32 Acres
Current Zoning: I-3 (Industrial: Heavy)
Proposed Zoning: RM (Residential: Multi-Family)
Location: 1616 10th Street, Columbus, IN

Background Summary:

The applicant has indicated that the proposed rezoning is for the purpose of developing an assisted living/memory care facility on the property.

Key Issue Summary:

The following key issue(s) should be resolved through the consideration of this application: Is the RM (Residential: Multi-Family) zoning district an appropriate change from I-3 (Industrial: Heavy)?

Preliminary Staff Recommendation:

Favorable recommendation to the City Council.

Plan Commission Options:

In reviewing a request for rezoning the Plan Commission may (1) forward a favorable recommendation to the City Council, (2) forward an unfavorable recommendation to the City Council, (3) forward the application to City Council with no recommendation, or (4) continue the review to the next Plan Commission meeting. The Plan Commission may recommend that conditions or commitments be attached to the rezoning request. The City Council makes all final decisions regarding rezoning applications.

Decision Criteria:

Indiana law and the Columbus Zoning Ordinance require that the Plan Commission and City Council pay reasonable regard to the following when considering a rezoning:

The Comprehensive Plan.

Preliminary Staff Comments: The Comprehensive Plan identifies the future land use of this property as being residential. The Comprehensive Plan further encourages infill development and a variety of housing types.

The current conditions and the character of current structures and uses in each district.

Preliminary Staff Comments: The subject property is located in an urban setting where development is of a more dense nature. The character of the current structures in the area is similar to this proposal with single family homes to the south and east and a proposed new multi-family apartment complex currently under review will be located east of the subject property. To the north of the subject property are the

Planned Unit Developments (PUDs) of Bartholomew Consolidated School Corporation Administrative Offices and the United Way Building. To the west of the subject property is a commercially zoned site (an electric substation) and 2 industrial sites (Quality Machine and Tool and small industrial shops).

The most desirable use for which the land in each district is adapted.

Preliminary Staff Comments: The property is surrounded by residences to the east and south, industrial and commercial to the west and PUDs to the north. If rezoned successfully, the subject property will create a gradual land use transition between the industrial, commercial and PUDs properties as the proposed development is a residential use.

The conservation of property values throughout the jurisdiction of the City of Columbus.

Preliminary Staff Comments: The proposed development is considered infill development and would be utilizing a blighted property, which in turn can enhance the surrounding neighborhood.

Responsible growth and development.

Preliminary Staff Comments: The subject property was once a part of the former Golden Castings Foundry. The reuse of this site for non-industrial development would benefit both the immediate neighborhood and city as a whole.

Current Property Information:	
Land Use:	Vacant/Undeveloped
Site Features:	There are no significant site features on the subject property.
Flood Hazards:	There are no flood hazards present on this property.
Special Circumstances: (Airport Hazard Area, Wellfield Protection Area, etc.)	There are no special circumstances related to this property.

History of this Location:

The relevant history of this property includes the following: The subject property is part of the former Golden Casting Foundry where high grade iron castings were manufactured. In June of 2013, a request to allow a community recycling center, including a scrap yard on the subject property was denied. The Board found the request was not consistent with other industrial sites in the neighborhood or the recommendations of the Comprehensive Plan for neighborhood compatibility.

Comprehensive Plan Consideration(s):

The Future Land Use Map indicates the future use of this property as Residential.

The following Comprehensive Plan goal(s) and/or policy(ies) apply to this application:

1. **POLICY A-1-1:** Encourage mixing of housing prices in all geographic areas of the city.
2. **POLICY A-2-1:** Strive to eliminate blighted areas.
3. **POLICY A-2-9:** Preserve and enhance the character of neighborhoods.
4. **POLICY A-4-2:** Encourage infill development, and/or use of vacant parcels for projects such as parks or other amenities which complement the neighborhoods in which they are located.
5. **POLICY A-4-3:** Prevent urban sprawl.
6. **POLICY A-4-5:** Prevent development in areas where such development would jeopardize health or safety.
7. **POLICY D-1-1:** Promote orderly housing expansion in locations where the city's infrastructure and services have the capacity to accommodate the growth.
8. **POLICY D-1-3:** Encourage development adjacent to already developed areas.
9. **GOAL D-2:** Encourage development of sufficient supply of diverse housing types, sizes, and price ranges in the community.
10. **GOAL D-3:** Provide high-quality residential neighborhood environments.
11. **POLICY D-3-1:** Encourage projects which improve and revitalize neighborhoods.

This property is located in the Columbus Central Neighborhoods character area. The following Planning Principle(s) apply to this application: Infill development that compliments existing neighborhoods should be encouraged.

Planning Consideration(s):

The following general site considerations, planning concepts, and other facts should be considered in the review of this application:

1. The subject property is part of the former Golden Casting Foundry where high grade iron castings were once manufactured. In 2006 site clearance began to remove the structures on site. The applicant is proposing to construct an assisted living/memory care facility with 40 beds for memory care and 40 beds for assisted living on the subject property. The proposed rezoning will facilitate the redevelopment of the subject property into a compatible neighboring land use.
2. The applicant has indicated that a 3 story concrete building exists on Lot 2 of the subject property, along with concrete piles and other debris. The structure will be demolished and all debris will be cleared for site preparation. The applicant will be voluntarily implementing a remediation plan in conformance with Indiana Brownfields Program and the Indiana Department of Environmental Management (IDEM) requirements.
3. On Lot 1, east of the subject property The Gateway Apartments are currently under review in the Planning Department. The advent of this development and the applicant's proposal are aligned with the Comprehensive Plan's indication for this property to be used as residential.
4. According to Zoning Ordinance Section 8.2 A (2), whenever a property is rezoned and there is no existing landscape buffer, the property that is rezoned is required to provide the buffer. Zoning Ordinance Table 8.3 describes the types of landscape buffers that are required when residentially zoned sites are adjacent to commercial or industrial sites. The subject property will be required to provide a Type A landscape buffer along the west property line due to the existing commercial and industrial zoned properties. Type A buffers require a minimum width of 25 feet in addition to the minimum setback required by the City of Columbus Ordinance. For example, multi-family structures would require a 10 foot side setback. The materials of the buffer shall consist of a fence or wall with landscaping, an opaque tree screen or a combination of both.
5. The character of the current structures in the area are similar to this proposal with single family homes to the south and east and a proposed new multi-family apartment complex currently under review will be located east of the subject property. To the north of the subject property are the Planned Unit Developments (PUDs) of Bartholomew Consolidated School Corporation Administrative Offices and the United Way Building. To the west of the subject property is a commercially zoned site that is an electric substation and 2 industrial sites—Quality Machine and Tool and small industrial

shops. If successfully rezoned, this site will create a gradual transition of land use from single-family, to multi-family to more intense uses on the adjacent western properties zoned I-3 (Industrial: Heavy) and CC (Commercial: Community Center).

6. The site is centrally located near many parks and recreation sites in the area: Greenbelt Golf Course is approximately ½ mile to the east, Lincoln Park-Hamilton Center is approximately ¾ mile to the northeast, 9th Street Park is approximately 1/5th of a mile to the southwest and Donner Park is about ½ mile to the northwest.
7. The site is located near two public bus routes: Routes 2 and 3. Route 3 has the closest access to the subject property less than ¼ mile away.
8. The site is also centrally located for ease of access to bicycle and pedestrian routes. The closest dedicated bike or walking path is due east about 1000 feet. The neighborhood itself lends to many walking routes on local streets that generally enjoy lower traffic volumes.
9. The closest grocery store is Kroger which is located at the intersection of Central and US 31. This is approximately 1 ½ miles north. In addition, 25th street offers a variety of shopping choices, also 1 ½ miles away.
10. Regarding traffic flow, the site will be accessed by 10th Street, Cottage Avenue, and 12th Street. The surrounding streets increase in traffic volume are as follows: 11th Street to the west, categorized as a Local Street but serves as primary access to Washington Street. Central Avenue to the east which is a Collector Street and 17th Street to the north which is also a Collector Street.
11. In October 2012, the Redevelopment Options Study was finalized on the Golden Casting Foundry Site (subject property). Several general recommendations were made regarding the study area. The study suggested the following list of development options:

- Option A: Residential

New residential on the Foundry Site can consist of a mixture of income levels, designs, and densities. A mixed-density development that offers single-family homes alongside duplexes and multi-family units could be an option in order to get the maximum value out of the development. According to area stakeholders, there is an identified need for affordable housing in the City of Columbus. The design of the new homes should also be greatly considered. There should be an emphasis on scale, size, and design of the new homes in order for the development to blend with the existing homes in the area but also be distinct in character.

- Option B: Mixed-Use Development

Mixed-use is a development concept where different uses are combined together in close proximity to each other. Uses such as residential, office, and retail are mixed into one project. Mixed-use can be limited to one building or can be an entire neighborhood and can be found in both large and small cities. A typical example of mixed-use is retail on the ground floor with either housing or office space on the upper floor. Main streets in small towns are usually examples of mixed-use. The former Foundry site could be an ideal location for a mixed-use development. As in the residential only option, the development could offer a percentage of homes available at a rate lower than market value in order to serve the need for affordable housing in Columbus. The development can have a small neighborhood commercial area such as a laundry facility, pharmacy, cafe/deli, or small convenience/grocery store. In addition, a mixed-use development can have a small park, a gathering place such as a square, or some other amenity available for public enjoyment.

- Option C: Office Development/Business Incubator

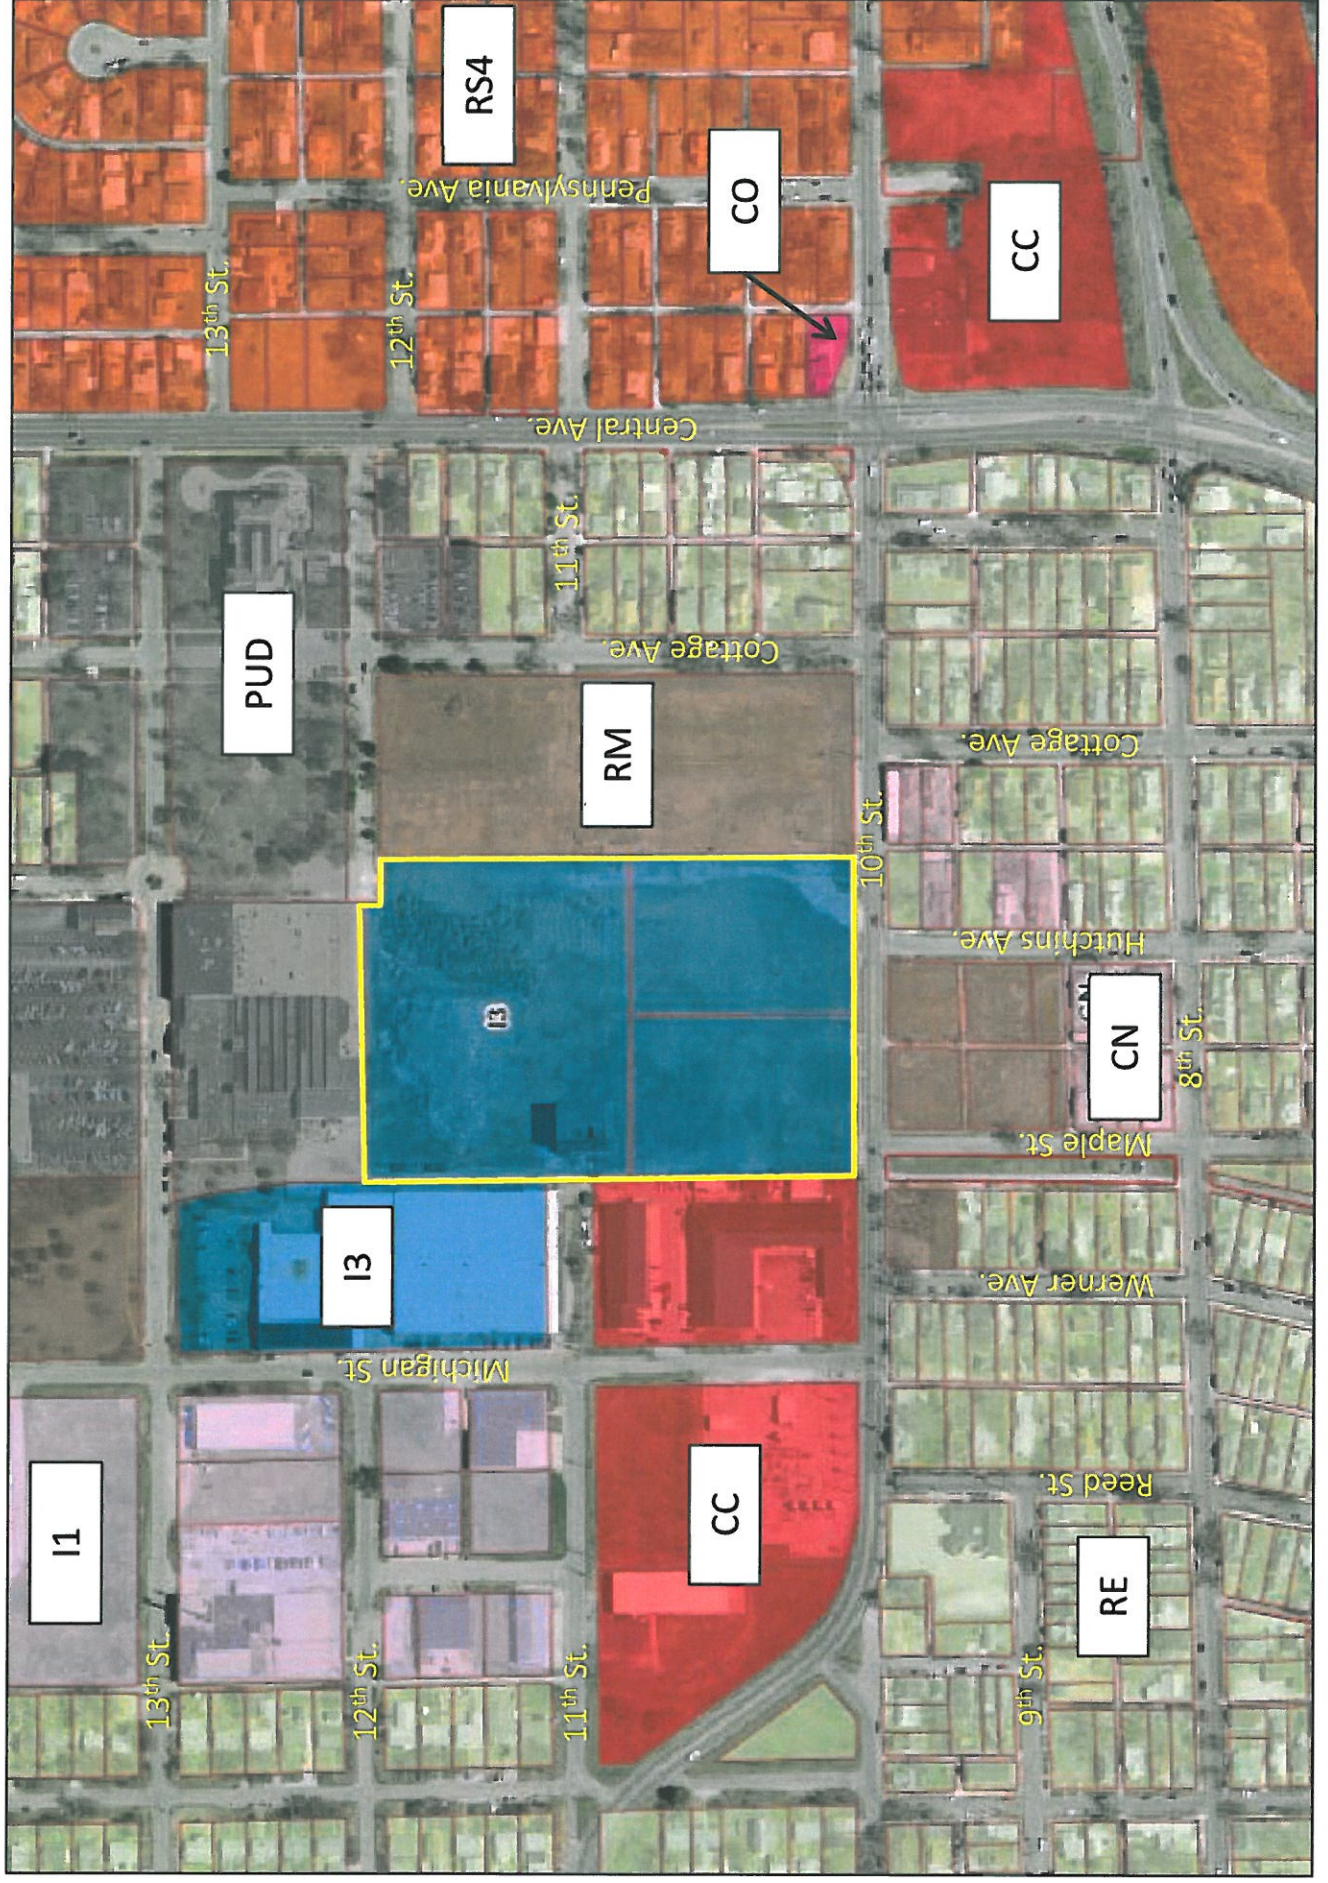

Office space may be considered on the former Golden Casting Foundry site because of the close proximity to other office uses in the area. Office space can be occupied by professional services and other types of business related services. The design of the office development can relate to the surrounding area or it can become a unique architectural statement either with the building or with neighborhood friendly features such as green space.

- Other Options & Alternatives

The former Foundry site should be seen as an opportunity. As mentioned, the site can be used for more practical developments such as office space, housing, or mixed-use development. However, the Golden Casting Foundry public open house sessions allowed for the community to use their imaginations in presenting some other less traditional options for the Foundry site. Listed below are some of the other suggested options that could be developed on the site or incorporated with the main development options.

- Interactive Fountain / Small Community Park
- Sustainable, Environmentally Friendly Community with Green Architecture
- Park with Unicycle Training Center
- Company Headquarters (Corporate campus for large corporation.)
- Athletic Complex / Sports Fields with Unique Features such as Rock Climbing Walls
- Trails
- Park with Unique Picnic Areas
- Vocational School
- Unique, Varied, Centerpiece area with Shops, Book Stores, Art/Craft Stores, and Cafes

MEMORANDUM

TO: Columbus City Council Members
FROM: Jeff Bergman
DATE: September 9, 2014
RE: VAC-14-02 - Lancelot Lane Right-of-Way Vacation

Please recall that at your July 15, 2014 meeting the Council considered a request from Autumn Sandlin and Thomas and Teresa Woods to vacate the right-of-way for Lancelot Lane, which runs between their properties at 3321 and 3341 Crescent Way. As we discussed, this right-of-way was included in the original plat of the Hillcrest Subdivision and was intended to provide a future connection to the property to the south. That property later became the site of a church and a through street was not needed. The Lancelot Lane right-of-way is unimproved – it does not contain a street, sidewalks, utilities, or other elements of a street system. The applicants wish to have it vacated and the land added to their respective lots.

At the July 15 meeting the Council voted to place this matter in proper channels and the applicant was instructed to proceed with the preparation of the administrative subdivision plat necessary to document the vacation. This task has been completed and this matter is now ready for final approval. A copy of the administrative plat is attached for your reference. The Planning Department has reviewed the plat and found it to be in order.

Please feel free to contact me with any questions you may have.
